AAAAAAAUGH!!!

b6
b7C

Asking the Security Division if we should be more restrictive is like asking an ice cream salesman if we should buy ice cream.

The intent of the EC is evident both from its provenance and from the "Synopsis". The EC is from DI's Issues Group, which sits on the Information Sharing Policy Group (not the Information Restricting Policy Group, which, I believe, is somewhere deep in the bowels of the Security Division). The Synopsis explains that the DI is trying to "right a wrong" that is harming the FBI's information sharing efforts: "the fact that many texts which should be widely circulated among the community of investigators and analysts are currently marked ORCON."

If the result of this EC is that the FBI starts restricting more information, that would be entirely the OPPOSITE of what the EC calls for.

Normally I agree with you, [REDACTED] but if you push this any further I'm afraid I'll have to catch the next plane to Washington and submit you to some combination of therapy and Chinese water torture until you come to your senses.

I see the EC as saying that we should make sure the info is not posted to locations you can get to without a need to know. Red Wolf and [REDACTED] all have access controls that ensure that compliance.

I guess if no one ever thought it should be on there before, I'm making a mountain out of a pebble. If the general consensus is it's overkill, I will ask Security Division and see what they say; if they think it's not necessary, I will cease and desist.

Hey [REDACTED]

There are a lot of problems with [REDACTED] but will try and help you guys.

First of all, I do not believe you have enough space right now to support another Red Wolf workstation, but will see what we can do. Remember the Red Wolf that you have is a [REDACTED]

Space up there is tight. I was told that the RA, right now, can not support [REDACTED] (Due to A/C problems and electrical requirements). Remember, I tried to get [REDACTED] to give me space and light for getting a Red Wolf system up there but [REDACTED] would not commit, stating that squad spaces had not been firmed up. The fight is over, up a [REDACTED] and [REDACTED] has to live with a [REDACTED]. The [REDACTED]

[REDACTED] personnel problems continue to plague the Main Office. I believe around two [REDACTED] employees will be leaving [REDACTED] within the next few months. [REDACTED] is our major concern. At the present time [REDACTED] can not give [REDACTED] the support it really needs. I believe we need to have a meeting to discuss all of [REDACTED] issues and what we can support.

Thanks,
[REDACTED]

b7E

The email below notified the field of the deployment of a procedure to [redacted]

[redacted] which they wanted exempted from the process that they should notify us by 24 Jul 06. To date we have received such requests from less than a dozen sites.

Please note - **This procedure will be activated field wide beginning tomorrow.**

This is your last chance... If you have no special configuration requirements - an email so stating would be appreciated.

Thanx

[REDACTED]
I recall we discussed this back in early June, do you have any email records or other notes of our views?

As I recall, the process is to [REDACTED]
[REDACTED]

NSLB's concern is that because OIPR considers call session data (they call "metadata") to be subject to the standard minimization procedures (SMP), anytime that data is copied and put into another "system" it must be done in compliance with the SMP. For example, because [REDACTED] for communications intercepted pursuant to FISA coverage is loaded into [REDACTED]

b2
b5
b6
b7C
b7E

[REDACTED] is not a separate "database" but it's more akin to a copy or report of the [REDACTED]. Unfortunately, if [REDACTED] is subject to Minimization, then before a copy or report can be produced it must be properly minimized-- It may be more useful to deem the [REDACTED] from RedWolf or RedWolf active storage)

[redacted]
Hopefully one or both of you can help us out with our purchase request as it has been languishing "in the approval process" for a long time. My original immediate EC went out 3/14/2006 [redacted] followed with a specific monetary request EC dated 4/20/2006 (attached below). Please read the email chain for background info. Apparently, [redacted] has legality concerns regarding [redacted] I need someone (hopefully one of you guys) to pass on the following information to [redacted]'s Office so his concerns can be alleviated:

[redacted] is not a [redacted] As the name implies, it is simply a [redacted]

[redacted]
In summary, the [redacted] is essential for our [redacted]. The important highlights of this email -

[redacted]
(4) The system will cost between [redacted] to build (per ERF). The system can/will be used for other [redacted] once the major case is complete. Please let me know if further information or clarification is needed. Thank you.

All-- would you help me answer the below questions, Please!

1) Re: access decisions and who controls the operation of the system--e.g., who tells the field or the system administrator how they should determine who gets access to the system--in other words, who is the ultimate gate-keeper of the system and its data>

[REDACTED] If the question is who at [REDACTED] tells the field how they should determine access - I suppose that would be the [REDACTED] according to the system security plan (SSP) Guidelines and default privileges for the various roles on the system are described in the SSP. Special requirements (additional privileges) are determined/justified at the site level by the [REDACTED] and [REDACTED]

2) Re: deletion of data--any record made of deletions.

[REDACTED] - this would also indicate that a session has been deleted... We do not however currently [REDACTED] such as [REDACTED] ... Typically linguists do not delete [REDACTED] - they reside on the system indefinitely.

b2
b6
b7C
b7E

3) Re: auditing of pertinence markings and changes made to pertinence markings? What kind of a report would should show that pertinence marking changes have been made to a particular document or session?

[REDACTED]

Thanks in advance-- [REDACTED]

Subject: RE:

UNCLASSIFIED
NON-RECORD

Does each database have a program manager here at headquarters? Is that the person responsible for the operation of the system? Do they set any parameters on what access should be granted by the system administrator at the field office level? To the extent that below and in the course of your descriptions, you've made generalizations about who is granted access in a particular system, where does the information come from?

At the field office level, will there be one system administrator for all the databases, or does each database has its own system administrator? Do you know if they have to have certain qualifications, or are at a certain GS level?

I am just trying to get a feel for what responsibilities for the database come from headquarters and what responsibilities are in the field. I am going to be sending an email to the field asking some of these questions of them, as to the minimization requirements, their use of markings, deletions, etc., so I am just trying to figure out what information the field should have versus what information headquarters has. For instance, given that [REDACTED] [REDACTED] ? Or in [REDACTED] where would I find out if data is ever [REDACTED] in other words, in trying to find out if the [REDACTED]

Thanks. [REDACTED]

Okay. Thanks.

[REDACTED] also had a question as to why we would delete from [REDACTED] not being in place, since it might otherwise leave a misimpression, when we say there are [REDACTED] that they are being used. As it was written --I thought it said more than necessary. As a pure factual matter the [REDACTED]

[REDACTED] is not clear. If you say its not used, then it would be in our interest to say why not AND why we think operating it without auditing is okay. But simply saying that [REDACTED]

b2
b6
b7C
b7E

Also, [REDACTED] wants to know the following about each database -- exactly what criteria are used to determine who gets access and who applies those criteria; also whether there is a provision for users to have been trained in the [REDACTED] and whether there is any form or something to that effect that an authorized user has to sign acknowledging that they've read or know the [REDACTED]

Neither I nor OTD can answer the [REDACTED] training/certification question--If there is a policy requiring such, it

[REDACTED]

b2
b4
b7E

AS to "what criteria are used to determine who gets access and who applies those criteria:"

For [REDACTED] The systems administrator for the field office [REDACTED] system

[REDACTED]

For RedWolf: The case agent and the system administrators in the office where the audio is collected have access to the [REDACTED]

[REDACTED]

For [REDACTED]

[REDACTED]

b2
b4
b7E

[REDACTED]

Also, as to Red Wolf, do we have any idea of the number of authorized users or is that something the field offices would have to provide. The field offices will have to give office specific numbers

Lastly, are Red Wolf [REDACTED]

[REDACTED]

[REDACTED] RedWolf systems are generally [REDACTED]

[REDACTED]

desktop)- are they stand alone computers in the field offices, or accessed from the same computer? Do you happen to know?

Thanks, as always.

Therefore, with respect to each of the five listed databases - [REDACTED] Red Wolf, [REDACTED] please provide:

- 1) the identity of the system administrator
- 2) the identity of the parties granting access to the database - the system administrator, the case agent, or some other person

3) the criteria for granting access to the database

4) whether minimization training is a prerequisite to becoming an authorized user

5) whether there is some documentation as to the minimization training of the users

6) whether the marking capacity of the database is being used (this is a subjective analysis but I would think it would be possible to generalize as to whether in fact users of the database are making use of the capacity to mark data on a consistent basis, sometimes, rarely, never, etc.) -- of particular concern is the privilege marking, so if the privilege marking is being used, we'd like to know

7) whether the deletion capacity of the database is being used (again, this is a subjective analysis but probably subject to generalizations that the deletion capacity is being used consistently, sometimes, rarely, never, etc.) - again, of particular concern is the privilege marking so if privileged communications are being deleted, we'd like to know

8) any other information that you think would be helpful to us in determining whether in fact authorized users of the databases are aware of the obligation to minimize and whether in fact minimization is taking place with respect to these databases.

To the extent that your previous response answers these questions, please just reference that response. I think that the earlier EC focused access questions more on who had access rather than the criteria, so I don't think this request is redundant. But, again, to the extent you may have already answered the access questions set forth above, just reference your previous EC. We are not trying to be duplicative.

Please provide responses to [redacted] by the COB Friday, February 10, 2006. Questions can be directed to me - [redacted] As always, your cooperation is greatly appreciated.

Subject:

DCS 5000 C&A

SENSITIVE BUT UNCLASSIFIED
NON-RECORD

b2
b7E

The DCS 5000 / RedWolf system has received Approval To Operate (ATO) from SecD based on a type certification and accreditation process. I will be providing copies of all relevant C&A documentation, including the System Security Plan, the User's Guide and Privileged User's Guide, and the Implementation/Migration Plan which will lay out the processes and timetable for deploying the approved security configuration and policies to the field systems.

In preparation for this deployment, request that Field Office TA/TS/TTA personnel review the attached spreadsheet containing key support personnel. It lists

System Administrators/Alternates - those who are primarily responsible for day to day administration of the system, adding new users, etc.

Software POCs - those individuals (government) to whom we should send any software updates for the system.

Local System Security Managers - Those personnel (government) who will be responsible for the security of the system, to include validating user account requests, and reviewing local system audit logs. - more on that in a later email --- we are working on some tools to simplify this process.

Please verify that each position has someone assigned to it. The system administrator should not be a security manager- since part of the security manager's responsibilities include insuring that the system administrator is complying with appropriate guidelines.

Also each facility should indicate any additional personnel requiring Privileged User access to the system - generally this would be anyone with Operating System access/// not application access. Privileged User accounts will be verified/validated by the [] here at ITD. All standard user accounts will be validated and managed locally.

Please review and provide your input as soon as possible - There is a lot of work that has to be done, and we really do need to get it underway.

b2
b6
b7C
b7E

The attached e-mail has several questions in follow-up to the FISA Court's Order of December 9, 2005. A copy of the response to that order is being routed thru BuMail to each of you so you may remind yourselves of you earlier responses.

The Questions and responsible parties for answers are:

[REDACTED] TICTU (1) how does the info get into the databases - e.g., disc or automatic electronic transfer from the carrier/ISP or the listening post to [REDACTED] which inputs it into [REDACTED] etc ??? [this is the least important but they were having trouble visualizing how this work]

~~SECRET~~

~~SECRET~~

This is where the last vugraph may be inserted with descriptor...Electronic transfer from access system

[redacted] TICTU (2) some screen shots for each system - so they can see what we mean by marking something non-pertinent, privileged, etc, as well as other features of each system - also help show what subsequent users see when they pull up a piece of info which another analyst has already reviewed

b2
b7E

You can use the diced screen shoots from the third vugraph or using the training material....

[redacted] TICTU (3) perhaps an example of what an audit trail print out would look like for each system

The audit write up has the screen shot for the history....should add examples of login, etc.

TICTU (4) for Red Wolf - they did not understand re the "list" "party" re "session" - what does it mean to be included in these "lists", sessions, etc

[redacted] (5) they want more specifics re how the National Archive Retention works vis-a-vis the 11 yrs

FBI retention

[redacted] TICTU (6) same issue re "back up" retention for as long as "operationally necessary"

N/A (7) specifics re how destruction is accomplished

N/A (8) some other minor but specific issues, e.g., re [redacted] which we could not answer.

(S) Please provide responses back to [redacted] and I by Wednesday, March 29, 2006. Copy to [redacted] so she may assist in editing. It is our desire to do a briefing to the court on these matters. So, question 2 may be more appropriate to have in hard copy. My thought would be to do a demo here at ERF, but we'll save that play for later.

~~SECRET~~
RECORD [redacted]

~~SECRET~~

~~SECRET~~

[redacted] and I met with the Court's advisors on 3/17 re their reaction to the partial response re the databases - they were generally impressed but found it a little "heavy" to understand - based on their comments a further SHORT factual declaration might be advisable - here are the issues that might be in such a supplemental declaration:

- (1) how does the info get into the databases - e.g. disc or automatic electronic transfer from the carrier/ISP or the listening post to [redacted] which inputs it into [redacted] etc ??? [this is the least important but they were having trouble visualizing how this work]
- (2) some screen shots for each system - so they can see what we mean by marking something non-pertinent, privileged, etc, as well as other features of each system - also help show what subsequent users see when they pull up a piece of info which another analyst has already reviewed
- (3) perhaps an example of what an audit trail print out would look like for each system
- (4) for Red Wolf - they did not understand re the "list" "party" re "session" - what does it mean to be included in these "lists", sessions, etc
- (5) they want more specifics re how the National Archive Retention works [redacted]
- (6) same issue re "back up" retention for as long as "operationally necessary"
- (7) specifics re how destruction is accomplished [redacted]
- (8) some other minor but specific issues, e.g., re [redacted] which we could not answer.

b1
b2
b6
b7C
b7E

(S) Can we get together to discuss how to respond - we like the idea of the screen shots - but do not want to get into another huge declaration. Please contact [redacted] or myself re getting together re all this. In the meantime, I am working on a draft re the response re the other 2 issues in the Order which we hope to have to you perhaps as early as next week.

Thanks [redacted]

Subject: Minimization and database issues which need attention ASAP

~~SECRET~~
RECORD 99999-3333

[redacted] last week [redacted] and I were out in [redacted] for the minimization and [redacted] reviews (along with [redacted] from OIPR) and several minimization issues were identified which we think need attention ASAP - in addition [redacted] also asked me to ask about another database which he just learned about and which was not included in our database filing.

The [redacted] field office advised us that last year an inspection team of some sort had critiqued them for not getting their [redacted] within the required 30 day period - because this was due to the case agents being so busy they could not review the [redacted] and mark them up in time for ELSUR to process them, in October 2005 the field office instituted a policy of having the language specialists send one copy of every [redacted] to the case agent [redacted] and [redacted] copy to the ELSUR people who then automatically indexed into [redacted] all to/from names from every wire, wireless or audio [redacted] - this obviously by-passes the case agent who under the SMP is supposed to make a determination that the [redacted] - a year ago we learned during the [redacted] minimization review that the FBI was [redacted]

[redacted] and we mentioned that in the database filing - [redacted] also confirmed this
[redacted]

(1) where did this 30 day rule re indexing into [redacted] come from - we had never heard of it before ???

(2) we believe we need to quickly survey all the field offices to determine:

- (a) how they have responded to this 30 day rule - to make sure their practice conforms to the SMP; and
- (b) if any are actually indexing into [redacted] all to/from info from wire, wireless or audio coverages even when the case agent has not made the required determination re FI.

Several weeks ago when I was in [redacted] with [redacted] doing training, one of the monitors and the local computer guru described a feature re Red Wolf which I had not heard of - in [redacted] I again had described to me this same feature - which appears to be a [redacted] associated with Red Wolf which I believe we have not described to the Court - basically they described how RW collects the data for the monitors to use - [redacted]

b2
b6
b7C
b7E

Also, [redacted] advised that he had recently been told of another database called [redacted] which we did not describe in our filings with the Court - apparently there also may be other databases using the term [redacted] (something) " - -

Can we find out more about this/these databases ???

Please advise how we can handle these matters quickly. Thanks [redacted]

The [redacted] cited below could be referring to the [redacted] directory on the RW which contains [redacted] and ultimately the [redacted] and any transcripts.

So for example, you will have a directory [redacted]

Where [redacted] is the word perfect document containing the [redacted]

All [redacted] are saved to a similar directory structure on the fileserver and while the space is not unlimited,
-it is large and we have not had cause to see any [redacted] overwritten.

The other possibility is that the [redacted] refers to [redacted] which is setup also on a case file number basis and also contains all [redacted] ... which have been pushed from the RW.

Hope this helps ...
Let me know if you need additional info.

This AUSA [redacted] is also prosecuting the [redacted] case and the judge in that case has indicated that may have to call someone testify as to how RW collections work. The request is to identify who that person should be.

b6
b7C

FYI: Co-counsel on the [redacted] case apparently already has a flow-chart on how RW collections work--not sure who provided it--perhaps a local person...

There are other CIPA proceedings in this prosecution so the AUSA could handle this in CIPA if necessary to shows how the RW system collection conducts intercepts, stores, copies, how data is written to the MO, how data is reproduced on to removable media, etc..... has this been done before, does it have to been within a CIPA proceeding?

[redacted] is the NSLB atty assigned to the professor case.--I left her a voice mail message.

All: You are cordially invited to attend a meeting not yet determined.

Where: ERF

When: May 3 - ??

Time: ?

Subject: Develop capability to correlate CCC/CDC data for DCS-3000/5000

Last Wednesday, I spoke with [redacted] from [redacted] and discussed the need to develop a sound, reliable solution to correlate the CDC/CCC data for the RedWolf and the DCS-3000. [redacted] will not be available next week, but the following week appears to be open. What day and time is best for each of you during the week of May 3-7? Please send me your requests and make sure that you include more than one choice. I will coordinate what works best for the majority. Thanks so much.

PS [redacted] informed me that [redacted] have made the decision to begin developing "A Time Based Correlation" for now. I don't have any details about how this algorithm is actually calculated. We can definitely get more specifics at our meeting. Is this the direction we wish to go, or are there other ideas? This is what we need to discuss. Please ponder on this. Thanks.

Later,
-C-

b6
b7C

[redacted]

[redacted] wanted us to put something together for Mr. [redacted]. I think

Here is my input.

At the request of Language Services Section, Office of International Operations (OIO), SSA [redacted] and ET [redacted] attended a meeting to discuss the Work Flow Manager (WFM) currently in place for use with the DCS-5000 / RedWolf systems.

Attending the meeting were :

b2
b6
b7C
b7E

[redacted] (CTD)

[redacted] (CTD)

[redacted] (OIO)

[redacted] (OIO)

Mr. [redacted] was interested in the capability of the WFM to gather and report data which could assist him in

decision making regarding the collection and processing of FISA intercepts. We provided Mr. [] with a brief overview of the interaction between the DCS 5000 and WFM (PPT presentation attached). We also discussed some of the existing query/report capabilities of WFM and the possibility of developing case based or language based queries in the future. The discussions also addressed the 'tier' prioritization scheme being implemented for FISA cases, and how this could be included as feature of the DCS-5000 and WFM. We agreed that a follow-up meeting should be held which included representatives of the FISA Management Systems and [] to insure that we have a more complete picture of the process and possible technical solutions.

Language Services will coordinate the follow-up meeting.

[REDACTED]
[REDACTED] wanted us to put something together for Mr. [REDACTED] - I think

Here is my input.

At the request of Language Services Section, Office of International Operations (OIO), SSA [REDACTED] and ET [REDACTED] attended a meeting to discuss the Work Flow Manager (WFM) currently in place for use with the DCS-5000 / RedWolf systems.

Attending the meeting were :

[REDACTED] (CTD)

[REDACTED] (CTD)

[REDACTED] (OIO)

[REDACTED] (OIO)

b2
b6
b7C
b7E

Mr. [REDACTED] was interested in the capability of the WFM to gather and report data which could assist him in decision making regarding the collection and processing of FISA intercepts. We provided Mr. [REDACTED] with a brief overview of the interaction between the DCS 5000 and WFM (PPT presentation attached). We also discussed some of the existing query/report capabilities of WFM and the possibility of developing case based or language based queries in the future. The discussions also addressed the 'tier' prioritization scheme being implemented for FISA cases, and how this could be included as feature of the DCS-5000 and WFM. We agreed that a follow-up meeting should be held which included representatives of the FISA Management Systems and [REDACTED] to insure that we have a more complete picture of the process and possible technical solutions.

Language Services will coordinate the follow-up meeting.

Title: Revised Procedures for Handling Title 50
(FISA) Electronic Surveillance (ELSUR)
Material from the Red Wolf Digital Collection System

Synopsis: Due to the installation of a new FISA digital collection system and a [REDACTED] workstation, the procedures outlined below clarify and supercede all previous [REDACTED] Division communications pertaining to the [REDACTED] FISA digital collection system.

Details: The purpose of this document is to articulate policies and procedures for the proper handling of the [REDACTED] Disks that are used to archive Title 50 (FISA) Electronic Surveillance (ELSUR) material removed from the Red Wolf digital collection system. These procedures will ensure that proper "quality control" practices are in place to prevent the loss of any intercepted material and to maintain the integrity and chain of custody of the material. These procedures will follow the FBI's ELSUR guidelines.

To: [redacted] From: [redacted]
Re: 66-1871, 11/04/2004

The [redacted] FISA digital collection system was replaced and upgraded since the previous policy was approved. [redacted]

Due to the features of this new digital collection system, the procedures outlined below clarify, simplify and supercede all [redacted] communications pertaining to this subject matter.

Gentlemen,

The deadline for closing out the recommendations from the OIG audit is 01/19/2005. The verbiage below is from our previous response to recommendation 7. In reviewing the previous response, it seems we have responded primarily to the issue of [REDACTED] but we have not responded to the issue of [REDACTED]. Please

advise:

[Redacted]

The report needs to be delivered to OIG by 01/19, but I need to finish up by COB Friday to give it time to make it through all the hoops.

All,

(S) I spoke with [REDACTED] briefly this afternoon addressing the requests listed below. We've requested [REDACTED] for a quote to perform the four tasks described below. In addition, we have a mechanism in place to provide some technical support. A more comprehensive technical support plan is being discussed. In the meantime, we should get a quick response in order to review the expense and technical hurdles, if any. Our goal is to expedite these requests and get your testing started as quickly as possible.

To proceed forward, we plan to integrate a bi-weekly technical discussion/status mtgs between [REDACTED]. I will send a notification with details when this is established. Tentatively striving for next Tues afternoon. Please let me know if you have any further questions/concerns.

Regards,

[REDACTED]

(S)

[REDACTED]
It was under our impression from discussions with the [REDACTED] engineers that [REDACTED] is already supported on their [REDACTED]. They thought it would be just a simple [REDACTED] to enable this feature for our [REDACTED]. Again, we stress [REDACTED] would be the most cost effective and simple solution for interfacing various systems into the Redwolf. CALEA protocol seems to be left at the interpretation of the C.O. manufacturers and Redwolf developers and does not support (in our interpretation [REDACTED]). Another ERF Engineer, [REDACTED] is looking at [REDACTED] for a solution to interface [REDACTED] into the Redwolf and provide a solution for [REDACTED]. [REDACTED] engineers informed us that [REDACTED] was the best solution for [REDACTED].

This request for the four items is to allow us to begin to evaluate [REDACTED]. From this, we can determine what [REDACTED] will/won't support and return our recommendations for better support and integration. We have to get the systems first to be able to preform this evaluation. These four items, in our view based upon our exposure at [REDACTED] during training, would provide a quick way to get started on evaluation for future use. We already have other changes that we would like to have designed into the Redwolf but knew it would require major engineering changes/development by [REDACTED]. These items would be discussed at a later time with [REDACTED] and other engineers [REDACTED]. We do agree that there may and will be problems with [REDACTED] but we will find them through our testing. Again it was our understanding that [REDACTED]. Engineers at Raytheon believed that [REDACTED].

[REDACTED] is not left out. Right now, we need to see what [REDACTED] will/won't do so that we can come to the table with engineering changes. During this same time, [REDACTED] can define [REDACTED]. But this would be major engineering design changes/effort on [REDACTED] part.

~~SECRET~~

(S) [redacted]
I want to reiterate that since SPTU has been tasked to deliver [redacted] to RW, it would be best if SPTU runs with this and TICTU take an advisory role until after all testing/experimentation is completed. Consequently, any funding matters until completion should be borne with SPTU; afterwards...? In talking with [redacted] today, he lightly mentioned costs, but our discussion did not go much further since I thought it would be better if [redacted] and I was briefed to gain a better understanding of [redacted] TICTU and SPTU engage in those technical meetings you suggested below. There simply is not enough information for TICTU to chew on at this time which would afford us a better understanding of what needs to be accomplished and our role in accomplishing it. Default any monetary questions to me [redacted] You are doing a terrific job assisting SPTU during this phase and I am confident that will continue. I will be OOD until Thursday; call me on the cell if you feel more is needed or you have any suggestions.

[redacted] please look into the funding queries mentioned below. Thanks.

All,

I spoke with [redacted] briefly this afternoon addressing the requests listed below. We've requested [redacted] for a quote to perform the four tasks described below. In addition, we have a mechanism in place to provide some technical support. A more comprehensive technical support plan is being discussed. In the meantime, we should get a quick response in order to review the expense and technical hurdles, if any. Our goal is to expedite these requests and get your testing started as quickly as possible.

(S) To proceed forward, we plan to integrate a bi-weekly technical discussion/status mtgs between [redacted] I will send a notification with details when this is established. Tentatively striving for next Tues afternoon. Please let me know if you have any further questions/concerns.

Regards,

[redacted]

(S) Hi []

(S) I don't believe I've met you before, but want to introduce myself to you as one of the SSA's assigned to [] SPTU. One of his Programs [] has been tasked to deliver the evidence [] to Red Wolf (RW). I know [] is aware of this as [] have enlisted his invaluable help on several occasions already [] The effort has gotten to the point where I thought it would be appropriate for me to reach-out to you for some other (S) "needs" that we have, and also start cutting you and [] into our efforts.

(S) As a result of [] sessions at [] over the past 2 weeks [] determined that the following modifications/enhancements are needed for our [] RW systems (preferably prior to being sent-out from []

1. []

2. []
[]

3. []

4. Upgrade RW Software to newest version.

If it helps re the licensing issues, please stress to [] that [] The purpose of these systems is only for [] into Red Wolf in a format as currently specified by Red Wolf. We understand that if any of these changes need to be incorporated into the deployment package for Red Wolf, that another effort will be required with [] into Red Wolf is exploratory

(S) []
As we develop potential solutions to provide our data to Red Wolf in a way that will enhance the usability [] we anticipate that there will be questions/interface needs with [] Engineers. Is there a contracting vehicle available that already exist for us to take advantage of, or will this be an additional task with []?

You've probably got some questions about the basis for our needs here, so feel free to give me a call and we can sniff-out the next best step in our RW Interface effort.

Thnx-

Regards,

[]
